

Our Christian value this half term is LOVE.

“Love is patient, love is kind. It does not envy, it does not boast, it is not proud. It always protects, always trusts, always hopes, always perseveres” 1 Corinthians 13:4 & 7

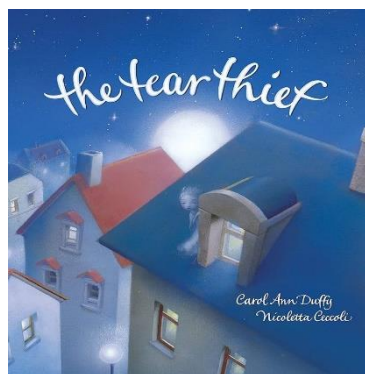

Year 1 Spring Term 2

Home learning: Please see the homework that will be sent in week 2.

Enquiry question: What is love?

Our key text is:

As mathematicians we will be:
Learning about the value of number up to 50. This will include counting from 1-50, making groups of tens, counting in tens and splitting numbers into tens and ones. Whilst learning these new skills will also be using skills that we have already learnt to explore number a little closer, for instance estimating on a number line up to 50 and solving one more and one less than a given number.

Towards the end of the term, we will be focusing on length and height, and mass and volume. This learning will consist of making comparisons between different objects.

When choosing our own learning we will:

Plan – Think about what we would like to learn and how we can achieve this.

Do – Follow our plans and review and adapt them as we explore our learning.

Review – Look back over our learning both formally and orally and say what went well, what we could change and to take feedback on how we can take our learning forwards.

As scientists we will:

Learn how to identify what living things need to survive and flourish. We will also learn how to recognise and describe how living things differ to non-living things, and how they change as they grow (including plants and animals).

In RE we will:

Be exploring the Islamic faith, finding out what Muslims do to express their beliefs, and learn about different celebrations that are important to Muslims, including Ramadan.

As readers we will:

Continue our phonics journey daily. We will enjoy a range of stories and non-fiction texts throughout the day and during our designated reading time.

As writers we will: Be completing writing daily in RWi lessons. In English we will be writing a narrative to retell a story from a different point of view or change of character.

As artists we will:

Be discovering the well-known artist Picasso. Whilst using Picassos famous line drawing to explore a new way of expressing art, we will also develop our knowledge of colour and tone.

As geographers we will:

Learn simple map symbols which will help us to read a map and even locate Grantham. The children will also learn the four points of a compass and use this knowledge to navigate simple maps. We will also be thinking about the causes and impact of traffic pollution.

In PE we will:

Be revisiting and building upon our knowledge and skills within dance from term 2. This will include understanding different dynamics of dance and how they can show an idea for movement. The children will explore different pathways and learn to copy and repeat dance routines.

In computing we will: Know that people sometimes behave differently online and the importance of online safety. We will also be creating animated stories online.

In PHSE we will:

Discuss how important family and friends are in making us feel happy, loved, and secure.

We will also learn about how money and work are linked and understand their importance.
